ORCHID PLANTS

SUMMER PRICE LIST - 1948

This summer list of orchids includes seedlings and mature plants of *Cattleya*, *Cymbidium*, *Dendrobium* and *Phalaenopsis*. All plants are of fine parentage, produced by modern cultural methods. You will be pleased with their vigor and with the quality of their flowers.

All community pots are standard 4" pots, with at least 10 plants per pot. The prices are based on this 10 plant minimum. As in our spring catalogue, all hybrid names follow those in the 1947 edition of Sanders where possible. New hybrid names, not listed by Sanders, are appearing currently in our advertisements in the American Orchid Society Bulletin.

Plants will be shipped by Railway Express on the mainland and by Air Express overseas unless otherwise specified. We qualify for shipments to Hawaii and need only your permit number to complete the shipment. Terms: cash with order; \$10.00 minimum; packing free of charge; shipping costs are in addition. We welcome requests for special quotations on quantity sales.

| Plant No. | NAME AND DESCRIPTION | Price Per Pot |
|-----------|--|---------------|
| 1 | LAELIOCATTLEYA MARTINETTI (C. Mossiae x L. tenebrosa) Petals and sepals of this old favorite are bronzed to varying degrees. The throat is deep reddish-purple. Spring bloomer. Mature plants in 6" pots. | \$17.50 |
| 23 | BRASSOLAELIOCATTLEYA LODESTAR (BLC. Dorothy Fennell x LC. Red Oak) Flowers on plants which have bloomed so far are medium dark with darker lips and a large area of bright yellow at the opening of the throat. November-January. Mature plants in 4½" pots. | 17.50 |
| 30 | LAELIOCATTLEYA WAUBESA (C. Tityus x LC. Asbery) Flowers have phlox purple petals and sepals. The throat blends toward a darker lip. The opening of the throat is marked with an area and veins of yellow. Mainly early spring. Mature plants in 6" pots. | 35.00 |
| 56 | BRASSOCATTLEYA JUNEAU (BC. Tashmit x C. Mossiae) Exists in two types with flushed or light phlox colored petals and sepals. The lip is mottled with a deeper purple and has a yellow area at the opening of the throat. Spring and early summer. Mature plants in 6" pots. | 40.00 |
| 71 | LAELIOCATTLEYA CANTAB X BRASSOCATTLEYA BAYFIELD The first parent is dark throughout with a broad ruffled lip. The second parent has a large, fringed Brasso lip with medium phlox petals and sepals. Both parents bloom in March. Intermediate plants in 3" pots. | 8.50 |

| Plant No. | NAME AND DESCRIPTION | Price Per Pot |
|-----------|---|---------------|
| 84 | BRASSOCATTLEYA MARIE-MARIE X LAELIOCATTLEYA RED OAK A cross of exceptional promise in size, texture and color. The last parent is one of our finest breeders with round, heavy flowers, dark phlox sepals and petals, and a rich deep purple lip, gracefully fringed. Both parents bloom in late autumn and early winter. Intermediate plants in 3" pots. | \$10.00 |
| 124 | CATTLEYA MONONA X CATTLEYA GIGAS Monona has large, phlox-colored flowers in late spring with a Mossiae lip. The gigas parent has exceptionally clear yellow eyes at the opening of the throat. Gigas blooms in early summer. Intermediate plants in 3" pots. | 7.50 |
| 134 | CATTLEYA DOWIANA AUREA X LAELIOCATTLEYA LA CROSSE A very vigorous hybrid from autumn blooming parents with extra large, fine flowers. Intermediate plants in 4" pots. | 8.50 |
| 141 | CATTLEYA TOWER X LAELIOCATTLEYA RED OAK The Glasnevin variety of <i>C. labiata</i> was used in the Tower parent. The hybrid should have flowers of fine form and dark color. Both parents bloom in the late autumn and early winter. Intermediate plants in 4" pots. | 12.00 |
| 174 | BRASSOCATTLEYA MINERVA (BC. Mrs. J. Leeman x C. Dowiana) Fine forms of these well-known parents were used in this cross. Both have yellow petals and sepals with dark lips. The Mrs. J. Leeman blooms in January. Strong seedlings in community pots ready for 2½" pots. | 17.50 |
| 177 | LAELIOCATTLEYA BLACK HAWK X LAELIOCATTLEYA WAUBESA Both parents produce medium dark flowers of good size and substance. Black Hawk blooms in early winter and Waubesa in late winter. Seedlings in 2" pots. | 3.00 |
| 182 | CATTLEYA AVERILL (C. Leomos x C. gigas Frau Melanie Beyrodt) This is a mating between two clear whites with purple lips marked with yellow eyes. Both bloom in June or July. Strong seedlings in community pots ready for 2½" pots. | 20.00 |
| 183 | BRASSOCATTLEYA MRS. J. LEEMAN X LAELIOCATTLEYA SAM HOUSTON Large richly colored flowers of good texture are expected. The blooming time should be variable. Seedlings in 2" pots. | 3.50 |
| 192 | LAELIOCATTLEYA CALIFORNIA X CATTLEYA DOWIANA This mating involves two autumn blooming parents. The improved strain of <i>C. Dowiana</i> was obtained by crossing <i>C. Dowiana aurea</i> with <i>C. Dowiana Rosita</i> . LC. California has a richly colored lip. Seedlings in 2" pots. | 3.50 |
| 210 | LAELIOCATTLEYA ROBERT PATERSON X CATTLEYA MONONA The parent selected from our stock of the first plant has dark flowers whose lips are marked with yellow veins and reddened at the opening of the mouth. May. The Monona parent bears well formed flowers of medium shade and has a fine habit of growth. March-May. Seedlings in community pots. | 12.50 |

| Plant No. | NAME AND DESCRIPTION | Price Per Pot |
|-----------|--|---------------|
| 220 | CATTLEYA SUAVIOR AQUINII X CATTLEYA PRINCESS ROYAL This is a mating between two parents whose flowers are mainly white and purple. The former has purple areas, at the petal tips, of depth in color and size similar to the lips. The plant of Princess Royal had a purple throat in addition to the purple expanded part of the lip marked with yellow eyes and veins. Both parents bloom in late spring or early summer. Seedlings in community pots. | \$17.50 |
| 226 | CATTLEYA MOSSIAE var. WAGENERI (Albino var. of species) The parent used for selfing is a fine example of the variety. Its texture is good. The white is enlivened by an area of golden yellow at the opening of the throat. Late spring. Seedlings in community pots. | 15.00 |
| 242 | LAELIOCATTLEYA WAUPACA X LAELIOCATTLEYA BLACK HAWK The Waupaca parent bears medium dark flowers of large size and good texture in the early winter. The throat shades towards a rich purple lip marked with yellow eyes. The Black Hawk parent has the same season and similarly marked throat but the petals and sepals are much darker and more conspicuously reticulate. Seedlings in community pots. | 20.00 |
| 487 | LAELIOCATTLEYA CHIPPEWA (LC. Mygdon x C. Schroederiae) Blooms in the first quarter of the year. Flowers are medium dark with darker lips and throats of intermediate hue. The mouth is variously marked with areas of yellow. Mature plants in 5" pots. | 25.00 |
| 607 | CATTLEYA ESTELLE (C. Cowaniae alba x C. Edithae) This hybrid blooms in the first and last quarters of the year. Flowers are large, white, have good texture, and are accented by areas of golden yellow at the opening of the throat. Mature plants in 6" pots. | 65.00 |
| 159 | CYMBIDIUM FLAME (Cymb. Louis Sander x Cymb. Ceres var. F. J. Hanbury, F.C.C., R.H.S.) The Louis Sander parent produces large, heavy, nicely formed, flushed white flowers. The Ceres used is a rich dark-flowered variety which produces a goodly number of blooms per spike. Seedlings in 2" pots. | 4.50 |
| 255 | CYMBIDIUM PRESIDENT WILSON X CYMBIDIUM ERICA SANDER The President Wilson parent is a free-flowering white of good substance and size with purple areas on the lip and flushed on the back side with pink. The Pitt variety of Lowianum was used in producing it. The Erica Sander parent is a fine example of this chaste green flower whose cream-colored lip is marked with brown areas at the borders. Seedlings in community pots. | 10.00 |
| 267 | CYMBIDIUM SAVANNAH X CYMBIDIUM JOYFUL The Savannah parent is a cross between President Wilson and Joy Sander. It has a yellow background flushed and veined with brown. Joyful has a yellowish-brown background with a darker mid-region in the sepals and is veined with pink. Both have lips marked with a Lowianum type area of reddish-brown and both produce a large number of flowers per spike. Seedlings in community pots. | 12.50 |

| Plant No. | NAME AND DESCRIPTION | Price Per Pot |
|-----------|---|---------------|
| 2145 | CYMBIDIUM RHODA (Cymb. Flamingo x Cymb. Pauwelsii) Free-flowering plants with pink flowers. The petals and sepals are in general well veined. The lip is variously marked with reddish-purple areas. Mature plants in 6" pots. | \$22.50 |
| 2158 | CYMBIDIUM MIREBALAIS (Cymb. Alexanderi var. Hamilton Smith x Cymb. Warbler) Most plants have pink flowers, although some have yellow, yellow-green, or yellow suffused with pink. The lips have reddish-purple spots and blotches. Mature plants in 6" pots. | 25.00 |
| 2160 | CYMBIDIUM JOYFUL (Cymb. Ceres x Cymb. Joy Sander) The flower color ranges from light cream to darker shades of brown. The lips are marked with areas of madder-purple. The Fire King variety of Ceres and the Rio Tinto variety of Joy Sander were used as parents. Mature plants in 6" pots. | 25.00 |
| 1423 | DENDROBIUM CHLOROSTELE var. JUNO (D. Linewianum x. D. Wardianum) A large number of dark colored flowers are produced in loose arching racemes in the winter and spring. Mature plants in 3" pots. | 12.50 |
| 2096 | DENDROBIUM NOBILE var. ROTUNDUM (species) Canes not as tall as in the species proper. Flowers are of medium size and rounded shape, and have flushed petal tips. Spring. Mature plants in 3" pots. | 12.50 |
| 196 | PHALAENOPSIS AMABILIS var. ELISABETHAE (species) This strain of P. amabilis was obtained from a mating between two outstanding plants of Elisabethae. Since the parents of Elisabethae (P. amabilis and P. Rimstediana) are actually identical, this hybrid must be reduced to a variety of the older species, P. amabilis. Mature plants in 5" pots. | 35.00 |
| 204 | PHALAENOPSIS JEANNE D'ARC X PHALAENOPSIS GILLES GRATIOT Vigorous progeny of this mating between two white flowered forms selected for good texture and well-filled flowers. Seedlings in community pots. | 17.50 |
